ABOUT ME

I am a dedicated, flexible college graduate with experience in Computer Science and Network Systems Management.

I have software development experience using C, C#, C++, Python, and Rust, as well as web application development experience using both MERN and MEAN stacks. In addition, I have experience and skills in building networks using both Cisco and AWS Cloud architecture. I am especially interested in Software Development and Web Development roles, and I believe that these skills and more can be used to enhance your business.
